## Claim Rejections - 35 USC § 103

- 1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 2. Claims 1-7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Voutsas (US 5,827,773) in view of Sasaki et al (US 5,970,368) recited in previous action. Voutsas discloses method for turning amorphous silicon in to polycrystalline silicon including solid phase crystallization is a method of crystallization in a furnace having amorphous silicon film and transparent glass substrate mounted on a relative low temperature heated susceptor (col. 2, lines 17-33). However, Voutsas does not disclose semiconductor film is heated by induction coil. Sasaki discloses a method for manufacturing polycrystal semiconductor film comprising the steps of installing an induction coil (4) in close proximity of a semiconductor film (9) on a non-conducting substrate (7), said induction coil (4) being disposed so that the electrical current direction is aligned parallel to the in-plane direction of said semiconductor film (figure 6); and introducing an alternating electrical current in said induction coil to generate an alternating magnetic field through said semiconductor film (col. 3, lines 37-42). It would have been obvious to one having ordinary skill in the art at the time the invention was made to utilize in Voutsas semiconductor film is heated by induction coil as taught by Sasaki in order to provide a uniform heat throughout the semiconductor film

Application/Control Number: 09/886,940

Art Unit: 3742

3. Claims 8-9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Voutsas (US 5,827,773), in view of Sasaki et al (US 5,970,368) and further in view of Arima et al (US 4,926,793) also previously recited. Voutsas /Sasaki disclose substantially all features of the claimed invention except said susceptor being made of metal or graphite. Arima discloses a susceptor being made of metal or graphite (col. 10, lines 13-15). It would have been obvious to one having ordinary skill in the art at the time the invention was made to utilize in Voutsas /Sasaki a susceptor being made of metal or graphite as taught by Arima in order to absorb heat by the alternating magnetic field through induction heating.

## Response to Amendment

- 4. Applicant's arguments with respect to amended claims 1-9 have been considered but are most in view of the new ground(s) of rejection.
- 5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

Application/Control Number: 09/886,940

Art Unit: 3742

Page 4

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Quang T Van whose telephone number is 703-306-9162. The examiner can normally be reached on 8:00Am 7:00Pm M-Th.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Ehud Gartenberg can be reached on 703-308-2634. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic
